

Duane Edgington
Curriculum Vitae
Monterey Bay Aquarium Research Institute
7700 Sandholdt Road
Moss Landing, CA 95039
Email to duane@mbari.org
831-775-1850

Professional Experience

<u>Monterey Bay Aquarium Research Institute (MBARI)</u> , Moss Landing, CA.	1999 - present
Software and Data Systems Engineering. Engineering and Management responsibility for software research and development, embedded software systems, graphical user interfaces, data system software, instrument software, and control systems for custom electronic systems. Data and instrumentation systems, and robotic vehicles. Principal Investigator (PI): (1) application of machine vision to underwater video analysis, (2) NSF grants on Ocean Observatory Instrument Interface Software.	
<u>Sun Microsystems Computer Company (Sun)</u> , Palo Alto, CA	1994 - 1997
Manager, Electronic Design Automation (EDA) software and Design for Test (DFT). First line management responsibility for EDA tools used by Desktop Systems engineering groups to develop custom integrated circuits and printed circuit boards. Managed software support and software development engineers. Responsible for computer resources and computer support staff for software engineers and design engineers.	
<u>VLSI Technology/Compass Design Automation (VLSI)</u> , San Jose, CA.	1983 - 1994
Manager, CAE Software; Principal Software Engineer. Second level and first line management responsibility for software applications. Managed group of software engineers, including project leaders, supervisors and managers. Responsible for department budget, hiring, development roadmap, new product development, internal test, product maintenance, external contracted development, and quality assurance. Principal Software Engineer responsibility for product development and special projects.	
<u>Applied Micro Circuits Corp. (AMCC)</u> , Cupertino, CA.	1981 - 1983
Engineer, ASIC development, CMOS and Bipolar Design Assurance	

Education

<u>Post-doctoral Research Fellow</u>	
Department of Neurobiology, Stanford University, Stanford, CA.	1978 - 1981
Muscular Dystrophy Association Fellow. Research on nerve growth and regeneration to muscle.	
<u>Ph.D.</u> Medical Sciences - Neurobiology,	
Harvard University, Graduate School of Arts and Sciences, Cambridge, MA.	1973 – 1978
Research in electrophysiology of vision, electrical properties of photoreceptive nerve cells and mechanisms of visual information processing.	
<u>B.S.</u> (with Honor), Biology	
California Institute of Technology (Caltech), Pasadena, CA.	1972 – 1973
Developed instruments for measuring scientific data. Conducted research in neurobiology and genetics of behavior with Prof. Seymour Benzer and colleagues.	
<u>B.S.</u> (with Honor), Engineering and Applied Science	
California Institute of Technology (Caltech), Pasadena, CA.	1968 – 1972
Electrical Engineering, Computer Science. Developed data analysis and visualization software for High-Energy Physics department.	

External Research Funding (Grants)

PI. NSF OCE-0330429 "SENSORS: Ocean Observing System Instrument Network Infrastructure" \$745,447 9/1/03-8/31/09

Co-PI. (Subaward) UCSC - NOAA NA16OC2936 "Mooring Technology Efforts in support of the Center for Integrated Marine Technologies" \$1,701,946 08/01/02 – 07/31/07

PI. (Subaward) NSF - "SDCI NMI: Observatory Middleware Framework" \$236,539 10/1/07-9/30/10

PI. (Subaward) NSF OCE-0957938 OCE-10056697 "Ocean Observatory Initiative" \$362,960 09/01/07 - 08/31/15

PI. NSF 1148213 Collaborative Research: SI2-SSI: Empowering the Scientific Community with Streaming Data Middleware: Software Integration into Complex Science Environments \$161,585 08/01/12 – 07/31/15

Committees/Panels

Co-chair, Remote Instrumentation Services in Grid Environment research group (RISGE-RG), Open Grid Forum (OGF). 2007 – present. Convene international group of computer scientists and researchers using advanced remote instrumentation (environmental sensor arrays, telescopes, electron microscopes, x-ray beamlines, particle accelerators, etc.). Convene 3 international meetings per year, plus one international workshop (co-located with International Workshop of Distributed Cooperative Laboratories: Instrumenting the Grid (INGRID). http://www.ogf.org/gf/group_info/charter.php?review&group=risge-rg

- 2007: Seattle, Washington, USA. OGF21. October 15-19, 2007.
- 2008: Cambridge, Massachusetts, USA. OGF22. February 25-28, 2008.
- 2008: Lacco Ameno, Ischia, Italy. INGRID2008. April 9-11, 2008.
- 2008: Barcelona, Spain. OGF23. June 2-6, 2008.
- 2008: Singapore, Singapore. OGF24. September 15-19, 2008.
- 2009: Catania, Italy. OGF25. March 2-6, 2009.
- 2009: Alghero, Sardinia, Italy. INGRID2009. April 1-3, 2009.
- 2010: Brussels, Belgium. OGF30. October 2010.

Program committee member, INGRID 2009, 2010. Review and judge technical contributions for publication and presentation.

Program committee member, ICPR 2014, 2016, 2018. Workshop Computer Vision for Analysis of Underwater Imagery. Review and judge technical contributions for publication and presentation.

Program committee member, ICMR 2015, program committee of International Workshop on Environmental Multimedia Retrieval. Review and judge technical contributions for publication and presentation.

Expert Panel Member, NOAA Fisheries Automated Image Analysis Strategic Initiative. Advise NOAA on Computer Vision technology and methods for fisheries image automated analysis. http://marineresearchpartners.com/nmfs_aiasi/Home.html

Patents

Puck interface adapter including drivers for interfacing serial device to host wherein puck implements command mode and pass through mode. United States Patent 6901464. Awarded May 31, 2005.

Abstract: The invention provides a plug-and-work sensor interface device named "puck" for fast and easy deployment of various types of serial devices, which include commercial off-the-shelf and custom-made sensors and instruments, in a distributed, dynamic oceanic observing network. In an embodiment, each puck is removably attached and electrically coupled to a specific sensor to be deployed. The puck comprises a non-volatile memory for associating and storing arbitrary binary information about the sensor and a microprocessor for controlling how the information is read from and written into the non-volatile memory. The sensor information may include unique sensor identifier, sensor metadata, sensor device driver, etc. The puck itself does not execute any of the device code; rather, a host retrieves the sensor information from the puck when the puck is plugged in. The retrieval can be done automatically or semi-automatically with user interaction. After introducing the sensor to the host, the puck retires into a pass mode, allowing the host to communicate directly with the sensor. According to an aspect of the invention, the deployment of any serial device essentially consists of the steps of removably attaching a puck to the serial device and plugging the puck into a host.
