EDUCATION

Massachusetts Institute of Technology (MIT)

Cambridge, MA

Ph.D. in Oceanographic Engineering from the Massachusetts Institute of Technology (MIT) / Woods Hole Oceanographic Institution (WHOI) Joint Program, June 2000. Thesis: "Spectral Feature Classification of Oceanographic Processes Using an Autonomous Underwater Vehicle". (Advisors: Prof. Arthur Baggeroer and Dr. James Bellingham. Thesis committee: Prof. Arthur Baggeroer (MIT), Dr. James Bellingham (MIT), Dr. Albert Williams III (WHOI), Prof. John Leonard (MIT)). GPA: 5.0/5.0

Master of Science in Electrical Engineering and Computer Science from MIT, and *Master of Science in Oceanographic Engineering* from the MIT/WHOI Joint Program, September 1998. Thesis: "Current Velocity Profiling from an Autonomous Underwater Vehicle with the Application of Kalman Filtering". (Advisors: Dr. James Bellingham and Prof. Arthur Baggeroer). GPA: 5.0/5.0

Northwestern Polytechnic University

Xi'an, Shaanxi, China

Master of Science in Underwater Acoustics Engineering, April 1991. Thesis: "Design and Implementation of a Multi-Beamformer of a Volumetric Sonar Array Using Digital Signal Processing (DSP) Chips". GPA: 91/100

Bachelor of Science in Electrical Engineering, July 1989. By early admission, selected into the elite freshmen class. Graduated No. 2 in the class. Thesis: "Adaptive Correlation Receiver of Linearly Frequency-Modulated Pulses". GPA: 91/100

RESEARCH AND INDUSTRIAL EXPERIENCE

Monterey Bay Aquarium Research Institute (MBARI)

Moss Landing, CA

December 2004 – present. Senior Research Engineer.

- Principal Investigator and Program Manager of MBARI project "Targeted Sampling by Autonomous Underwater Vehicles" funded by the David and Lucile Packard Foundation.
- Co-PI in Office of Naval Research (ONR) Project "Fault Detection, Diagnosis, and Mitigation for Long-Duration AUV Missions with Minimal Human Intervention". Supervisor of a junior team member.
- Team member in MBARI Projects "Autonomous Ocean Sampling Networks", "Long-Range Autonomous Underwater Vehicles", "Controlled, Agile, and Novel Observing Network", "Soundscape Research and Education", funded by the David and Lucile Packard Foundation.

Aware Inc. (a worldwide leader of Asymmetric Digital Subscriber Line (ADSL) technology)

Bedford, MA

January 2001 – November 2004. Senior Digital Signal Processing (DSP) Engineer.

- Led algorithm design, C programming, and modem testing of Analog Echo Cancellers (AECs) using leading manufacturers' Analog Front End (AFE) chips.
- Enabled ISDN (Integrated Service Digital Network) compatibility of G992.1 and G992.3 in Customer Premises Equipment (CPE) modems built on Aware's StratiPHY chips.
- Devised a method to increase bit-loading capacity under noise margin constraint when inter-symbol interference (ISI) dominates over noise. Programmed this method into Aware's ADSL firmware offerings.
- Added SNR-based auxiliary pilot tone functionality to CPE modems to improve digital phase-locked loop (PLL) performance.

General Electric Company Research and Development Center Industrial Electronics Laboratory

Niskayuna, NY

June 2000 – December 2000. Systems Engineer.

Major team member in "Filter Design and Optimization for Stent Detection in Interventional Fluoroscopy Images", a joint project of GE R&D Center and GE Medical Systems.

- Designed and combined spatial and temporal filters to enhance interventional objects in X-ray image sequences.
- Developed a spatial spectrum analysis tool using IDL (Interactive Data Language).
- Evaluated filter performance by adaptive forced choice tests.
- Took main responsibility for biweekly reviews. Co-authored the end-of-year project report.

MIT Sea Grant Autonomous Underwater Vehicle (AUV) Laboratory

Cambridge, MA

1996 – 2000. Research Assistant.

- Established the spatio-temporal mingled spectrum principle which concisely relates observations from a moving platform to the frequency-wavenumber spectrum of the surveyed stochastic process. Based on this principle, designed an AUV classifier for distinguishing between different oceanographic processes, jointly utilizing temporal and spatial information. An AUV's controllable speed tunes the separability between the mingled spectra of different processes. This property is the key to optimizing the classifier's performance. Demonstrated the AUV classifier by distinguishing between ocean convection and internal waves. Installed a SonTek acoustic Doppler velocimeter (ADV) on the Odyssey IIB AUV to measure current velocity in the Labrador Sea in 1998. Based on the vertical current velocity, the AUV classifier captured occurrence of open ocean convection in the Labrador Sea.
- Installed leading-edge Doppler sonars (RDI's ADCP and SonTek's ADV) on Odyssey IIB AUVs for 3-D current velocity measurement in the ocean. The sonar-equipped AUVs measured current velocity in the Haro Strait in 1996 and in the Labrador Sea in 1998. Also led a flow velocity measurement calibration experiment in the largest towing tank in the United States.
- Developed algorithms to extract earth-referenced current velocity from raw AUV-borne ADCP measurements. Used an Odyssey IIB AUV (installed with an RDI ADCP) to map 3-D current velocity in tidal fronts in the Haro Strait in 1996.
- Designed a method for autonomous triggering of an AUV from its underwater docking station on event detection. Wrote a real-time program in C.

Northwestern Polytechnic University Institute of Acoustics Engineering

Xi'an, Shaanxi, China

1989 – 1994. Research Assistant and Teaching Assistant.

- Lead investigator in a joint project with the National Key Laboratory of Acoustics of the Institute of Acoustics of the Chinese Academy of Sciences: "Theory and Hardware Implementation of Artificial Neural Networks for Direction-Of-Arrival (DOA) Estimation of Correlated Acoustic Sources". Developed the Complex-valued Generalized Hebbian Algorithm (CGHA) for extracting principal eigenvectors in the complex domain. Applied this algorithm to DOA estimation by a sensor array.
- By applying the technique of adaptive modeling, designed short FIR filters to implement arbitrary constant phase shift in a narrow band. Designed a narrow-band sonar multi-beamformer using a bank of such FIR filters, each filter connected to one transducer. Built and tested the multi-beamformer using dual TMS320C25 DSP chips.
- Designed and built a low-cost, pocket-size, Analog-to-Digital and Digital-to-Analog conversion board plugged in personal computers. Boards were used in the Freshmen Engineering Projects Laboratory of Virginia Tech.
- Designed and built a laptop computer data acquisition system for acoustic detection of underground ancient tombs.

TEACHING EXPERIENCE

MIT Dept. of Ocean Engineering jointly with Dept. of Electrical Engineering and Computer Science

1998. Teaching Assistant in "Sonar, Radar, and Seismic Signal Processing" (high-level graduate course in both departments) offered by Ph.D. thesis advisor Prof. Arthur Baggeroer (member of the National Academy of Engineering and IEEE Fellow). Developed the entire set of solutions to a new series of problem sets and examinations, which are re-used in succeeding academic years. Graded homework. Assisted students individually on difficult problems. Led students to utilize MATLAB simulations to understand tough signal processing topics, e.g., ambiguity function, two-scale process, and beam-pattern. Students' evaluation: "TA Y. Zhang was praised as being knowledgeable and helpful"; advisor's evaluation: "Excellent job."

MIT Department of Ocean Engineering

1995. Teaching Assistant in "Introduction to Geometric Modeling and Computation" (core undergraduate course) and "Transport, Fate, and Effects of Ocean Pollution" (high-level graduate course).

Northwestern Polytechnic University College of Marine Engineering

Xi'an, Shaanxi, China

Lectured in "FORTRAN Programming" (core undergraduate course) and "Microprocessor Systems and Applications" (graduate course). Instructed undergraduate students in a computer laboratory. Instructed graduate students on Digital Signal Processing (DSP) system designs using Texas Instruments DSP chips.

PROFESSIONAL SOCIETIES AND ACTIVITIES

- Senior Member (since 2005) of Institute of Electrical and Electronics Engineers (IEEE) Signal Processing Society and Oceanic Engineering Society.
- Member of American Geophysical Union (AGU).

- Member of Sigma Xi National Academic Honorary Society.
- Reviewer for journals: *IEEE Journal of Oceanic Engineering*, *IEEE/ASME Transactions on Mechatronics*, *IEEE Transactions on Neural Networks*, *IEEE Robotics and Automation Letters*, *Journal of Atmospheric and Oceanic Technology*, *Journal of Geophysical Research (Oceans)*, *Deep-Sea Research I & II*, *Journal of Field Robotics*, *Progress in Oceanography*, *Marine Technology Society Journal*, *Ocean Engineering (Elsevier)*, *Applied Ocean Research (Elsevier)*, *Ultrasonics (Elsevier)*, *International Journal of Neural Systems*, *International Journal of Advanced Robotic Systems*, *Advances in Earth Sciences (China)*, *Journal of Marine Science and Technology (Taiwan, China)*.
- Reviewer of funding proposals to the Schmidt Ocean Institute, 2016 and 2017.
- Reviewer of funding proposals to the Directorate General for Maritime Policy (DGPM) of Portugal, 2015.
- Reviewer of funding proposal to the University of Alaska Fairbanks Coastal Marine Institute, 2014.
- Reviewer of funding proposal to the Netherlands' Technology Foundation STW Water2014 Program, 2014.
- Reviewer of funding proposals (on underwater communications) to MIT Sea Grant, 2001, 2005, and 2008.
- Reviewer of funding proposal (on an acoustic network for ocean observations) to the National Science Foundation, 2007.
- Reviewer of funding proposal (on autonomous underwater environment monitoring) to the International Science and Technology Center (partly funded the U.S. Department of State), 2005.
- Assessing progress of four projects of City University of Hong Kong State Key Lab in Marine Pollution, 2014.
- Reviewer of funding proposal (on environmental protection and sustainable use) to the King Abdullah University of Science and Technology Center Competitive Funding Program, 2013.
- Reviewer for conferences: IEEE/RSJ International Conference on Intelligent Robots and Systems (2011), and IEEE International Conference on Robotics and Automation (2015).
- Invited co-chair of Session "Advancing Discovery, Observation, and Process Studies throughout the Ocean with Robotic Technologies" at the 2016 Ocean Sciences Meeting, New Orleans, LA, February 2016.
- Invited to attend the ExxonMobil AUV Workshop, Houston, TX, October 2015.
- Invited co-chair of Session "Underwater Vehicles" at the IEEE-Cyber 2015 Conference on Cyber Technology in Automation, Control, and Intelligent Systems, Shenyang, China, June 2015.
- Invited to attend the Keck Institute for Space Studies workshop "Satellites to the Seafloor: Autonomous Science to Forge a Breakthrough in Quantifying the Global Ocean Carbon Budget" and coauthored the final report. The workshop brings together 24 robotics and earth science researchers from the international oceanographic and space science communities to develop new methods of using a coordinated network of ocean robots and satellites to autonomously interpret data and communicate sampling strategies with a focus on using these technologies to understand the global carbon budget, October 2013 and February 2014.
- Member of Technical Program Committee of the WUWNet'13 (the 8th ACM International Conference on Underwater Networks & Systems), Kaohsiung, Taiwan, China, November 2013.
- Invited session co-chair at the 2007 AGU Fall Meeting in Session "New Methods in Observational Oceanography Posters", and the 2012 AGU Fall Meeting in Session "Mesoscale Ocean Processes Posters", San Francisco, CA.
- Invited session chair at the MTS/IEEE Oceans'2010 Conference in Session "Autonomous Underwater Vehicles: Hydrodynamics", Seattle, WA, September 2010.

SELECTED AWARDS AND HONORS

- Visiting Fellowship of Antarctic Gateway Partnership from University of Tasmania, Australia, May 2018.
- Adjunct Professorship, School of Ocean and Earth Science of Tongji University (Shanghai, China), April 2012.
- Finalist for MIT *Technology Review Magazine's* TR100 (100 young innovators globally selected for the potential to make major contributions to technological innovations), June 1999.
- Student Paper Competition Award of the 10th International Symposium on Unmanned Untethered Submersible Technology, Durham, New Hampshire, September 1997.
- Certificate of Appreciation awarded by the American Society of Mechanical Engineers (ASME) "in recognition of your outstanding project 'High Precision Flow Measurement from an Autonomous Underwater Vehicle' submitted for the ASME/Ocean Engineering Division's 1998 Best Student Project Competition", September 1998.
- Autonomous Underwater Vehicle (AUV) research on display at the MIT Francis Russell Hart Nautical Museum (1998 – present) and at the New England Aquarium (1999, sponsored by the National Science Foundation).
- Profiled in *Two if by Sea*, MIT Sea Grant/WHOI Sea Grant Joint Newsletter, Spring/Summer 1999. (<http://web.mit.edu/seagrant/pubs/2ifbysea/issues/spring99/profile.html>)
- Inclusion in *Who's Who in Science and Engineering* (1999 – present) published by Marquis Who's Who, New Providence, NJ, and in *2000 Eminent Scientists of Today* (2003) published by the International Biographical Centre, Cambridge, England.

- Woods Hole Oceanographic Institution Summer Research Fellowship, summer 1997.
- Third-class prize in China University Technological Invention Competition for entry “Pocketsize Low-Cost Analog-to-Digital and Digital-to-Analog Conversion Board Used in Generic Personal Computers”, November 1992.

AUTONOMOUS UNDERWATER VEHICLE (AUV) FIELD EXPERIENCE

1. Hawaii: Using Aku and Opah long-range AUVs for autonomous sampling and survey of an open ocean deep chlorophyll maximum Layer, 2018.
2. Monterey Bay, CA: running the peak-capture algorithm on the Dorado AUV to autonomously acquire peak-rhodamine water samples in a rhodamine dye patch, 2014.

3. Monterey Bay, San Pedro Bay, and Bodega Bay, CA: running the peak-capture algorithm on the Dorado AUV to acquire peak-chlorophyll water samples in phytoplankton patches for studies of harmful algal blooms and near-coast zooplankton, 2009 ~ 2014.
4. Monterey Bay, CA: running a 4-D front-tracking algorithm on the Tethys AUV to track an upwelling front for 5.5 days, May/June 2013. Led the algorithm design and mission script programming.
5. Monterey Bay, CA: running the Dorado AUV to autonomously and accurately detect an upwelling front and acquire targeted water samples in different water types across the front, June 2011 and May/June 2012. Led the algorithm design and wrote the C++ code.
6. Monterey Bay, CA: testing an algorithm on the Tethys AUV for autonomously classifying different water columns and acquiring targeted water samples across an upwelling front, April 2011. Led the algorithm design and code writing (in C++).
7. Monterey Bay, CA: testing an algorithm on the Tethys AUV for autonomously tracking the thermocline, August 2010. Led the algorithm design and code writing (in C++).
8. Gulf of Mexico: Deepwater Horizon Oil Spill Response Scientific Survey (organized by NOAA), May and June 2010. Developed and implemented an algorithm for the Dorado AUV's gulpers to capture peak-CDOM-signal water samples.
9. Monterey Bay, CA: testing an adaptive triggering method for the Dorado AUV's 10 water samplers ("gulpers") to capture peak fluorescence water samples in a thin phytoplankton layer, October 2009. Led the design, code writing (in C++), and implementation of the algorithm.
10. Monterey Bay, CA: running the Dorado AUV to track the thermocline in a tide-driven internal wave field, November 2005, May and August 2007. Wrote the AUV C++ code and the mission scripts.
11. Monterey Bay, CA: Synoptic Internal Tide Experiment, September 1999. Installed an RDI Acoustic Doppler Current Profiler (ADCP) on an Odyssey IIB AUV to measure current velocity over a long distance (10 km) in the topographically hostile Monterey Canyon. Planned AUV missions.
12. Massachusetts Bay, MA: Coastal Ocean Predictive Skill experiment, September 1998. Tested bottom-tracking functionality of an RDI Doppler Velocity Log (DVL) installed on an Odyssey IIB AUV.
13. Labrador Sea open ocean convection experiment, January 1998. Installed a SonTek Acoustic Doppler Velocimeter (ADV) on an Odyssey IIB AUV for high-precision current velocity measurement.
14. Cape Cod Bay, MA: AUV docking experiment, May 1997. Measured current velocity using a SonTek Acoustic Doppler Velocimeter (ADV) to support AUV docking operations.
15. Haro Strait, British Columbia, Canada: Autonomous Oceanographic Sampling Network experiment, June 1996. Used an Odyssey IIB AUV (installed with an RDI ADCP) to map 3-D current velocity in tidal fronts.
16. Buzzards Bay, MA: AUV docking experiment, March 1996. Participated in AUV launches and recoveries.
