Senior Research Specialist, MBARI

Get to know cephalopods: Natural history of the Cephalopoda

Cephalopods are famous for their color change, cognition, and contortions, but how do these abilities help them survive in the wild? Crissy Huffard switches hats from her role in the Pelagic-Benthic Coupling Lab here at MBARI to take us on a dive into cephalopod natural history, from the tropical intertidal to the deep sea.

Registration for this webinar is required and space is limited. [Please RSVP here.](#)
