Research interests

My research combines satellite products, models and *in situ* data to study ecosystem processes and physical/biological interactions in the coastal and open oceans. Current areas of research include physical and biological variability at regional and global scales, ecosystem response to climate and ocean change, bioluminescence in the upper ocean, biological hotspots in the California Current, connections between surface, midwater, and benthic communities, and the effect of tropical islands on phytoplankton biomass and biodiversity.

Education

- 2006 **PhD in Physical / Biological Oceanography**
Université Toulouse III, Laboratoire d'Études en Géophysique et Océanographie Spatiales (LEGOS), France. Graduated with honors (Very honorable).
Supervisor: Marie-Hélène Radenac
Thesis: *Physical controls on phytoplankton biomass in the western tropical Pacific.*
- 2003 **MSc in Oceanography, Meteorology and Environment**
Université Paris VI, France. Option marine biogeochemistry. Graduated with honors (Very good, rank 1st).
- 2003 **Engineering degree (BSc and MSc in Environmental Engineering)**
Ecole Centrale Paris, France. Option processes and environment, field conception, development, research. Graduated with honors (Good).

Research and professional experience

- 2020-present **Senior research specialist (MBARI)**
(Monterey Bay Aquarium Research Institute, Moss Landing, California, USA)
- 2014-2020 **Research specialist (MBARI)**
Integrating data from several MBARI research groups to study ecosystem processes. Topics include bioluminescence in the upper ocean, connections between surface, midwater and benthic communities, and process studies in Monterey Bay.
- 2018-2019 **Marie Curie research fellow (MIO)**
(Mediterranean Institute of Oceanography, Marseille, France)
Systematic analysis of island effects on phytoplankton biomass and taxonomy in the tropical Pacific (SAPPHIRE project, <https://sapphire.mio.osupytheas.fr>).
- 2010-2013 **Research associate (MBARI)**
Biological Oceanography Group, Francisco P. Chavez lab.
- 2007-2010 **Post-doctoral fellow (MBARI)**
Biological Oceanography Group, Francisco P. Chavez lab.
Primary production regulation in upwelling systems and in the world ocean. Description of low-frequency variability in physical and biological variables. Phytoplankton and primary production response to climate and ocean variability.

- 2003-2006 **PhD student (LEGOS)**
(Laboratoire d'Etudes en Géophysiques et Océanographie Spatiales, Toulouse, France)
Thesis: Contrôle de la dynamique de la biomasse phytoplanctonique dans le Pacifique tropical ouest. PhD thesis, Université Paul Sabatier (Toulouse, France), 263pp.
http://horizon.documentation.ird.fr/exl-doc/pleins_textes/divers11-03/010045462.pdf.
Use of multi-satellite data, in-situ data, and a physical regional modeling system to investigate chlorophyll variability in the western tropical Pacific, and to explain it by means of physical forcing.
- 2003 **Master / 3rd year engineering 6-months internship (LOCEAN)**
(Laboratoire d'Océanographie et du Climat, Paris, France)
Altimetric data study of the Antarctic Circumpolar Current in the Drake Passage.

- 2006 Ocean sciences meeting, Honolulu, Hawaii, USA: “A chlorophyll bloom in the western equatorial Pacific at the end of the 1997-98 El Niño: the role of Kiribati Islands”, presented by M.-H. Radenac (poster)
- 2005 EGU General assembly, Vienna, Austria: “Ocean color seasonal variability of the western tropical Pacific basin”, presented by M.-H. Radenac (poster)
- 2004 AGU Fall meeting, San Francisco, California, USA: “Seasonal variability of the SeaWiFS chlorophyll in the western tropical Pacific”. Outstanding student paper award (poster)
- 2004 GODAE summer school, Lalonde, France: “Seasonal variability of the SeaWiFS chlorophyll in the western tropical Pacific” (poster)

Recently funded research

- 2019-2022 NOPP: *The CeNCOOS MBON: Integrating remote sensing, in situ data and models to understand central California ecosystem responses to environmental change* (co-PI)
- 2017-2020 NASA (ROSES-2016): *Utilizing remote sensing, models and in situ data to elucidate ecosystem hotspots in a moving ocean* (lead PI, \$736,242)
- 2018-2019 Horizon2020 (Marie Skłodowska-Curie Individual Fellowship): *Systematic analysis of Pacific phytoplankton and islands regional effects* (108,173€)

Fellowships and awards

- 2017 Marie Skłodowska-Curie Individual Fellowship
- 2016 NOPP Excellence in Partnering award
- 2004 Outstanding student paper award, AGU Fall Meeting
- 2003 MENRT doctoral fellowship

Experience at sea

- Benthic cruise to Station M (off California): **Nov 2016** (R/V Western Flyer)
- CANON cruise off Monterey Bay, CA: **Sep 2010**, **Sep 2013**, **Sep 2014** and **Sep 2015** (R/V Western Flyer): CTD casts, primary production measurements
- Gulf of California expedition from Monterey Bay to La Paz, Mexico, **Feb 2012** and **Feb 2015**, onboard the MBARI R/V Western Flyer: CTD casts.
- CalCOFI cruises along line 67 off Monterey Bay, CA: **Jul 2007** (R/V Western Flyer), **Jun 2008** and **Nov 2010** (R/V Point Sur): CTD casts, primary production measurements
- TAO cruise along the 125°W and 140°W longitudes, **Aug-Oct 2005**, onboard the NOAA R/V Ka'imimoana: maintenance of the TAO buoy array, CTD casts, biological measurements.

Mentoring

- 2022 Lyndsey Claassen, MBARI summer intern (10 weeks)
- 2022 Grant Sanderson, MBARI summer intern (10 weeks, co-mentored)
- 2022 Nathan Kientz, MIO M2 master student (5 months, co-mentored), “*Study of finescale physical-biological coupling using Lagrangian sampling*”
- 2021 Lyndsey Claassen, MBARI summer intern (10 weeks), “*Characterizing water bodies in Monterey Bay using Dorado AUV time-series data*”

- 2021 Nicholas Trautman, MBARI summer intern (10 weeks), “*Exploring the relationship between zooplankton and climate in the California Current System*”
- 2021 Lael Wakamatsu, MBARI summer intern (10 weeks), “*Can zooplankton grazing rates induce toxic algal blooms in Monterey Bay?*”
- 2020 Lyndsey Claassen, MBARI summer intern (10 weeks), “*Revealing the Monterey Bay upwelling shadow front using Dorado AUV time series data*”
- 2019 Ibrahima Coly, MIO M2 master student (5 months), “*Seasonal and interannual variability of phytoplankton blooms in the Southwest Pacific*”
- 2017 Ashaar Sanchez, MBARI/REU summer intern (10 weeks), “*Environmental factors influencing zooplankton diel vertical migration in Monterey Bay, California*”
- 2016 Alaina Smith, MBARI summer intern (10 weeks), “*Factors affecting plankton type dominance in Monterey Bay*”

Professional activities

Journal reviews: Nature Climate Change, Nature Communications, Nature Geoscience, Scientific Reports, Geophysical Research Letters, Journal of Geophysical Research, Limnology & Oceanography, Frontiers in Marine Science, Remote Sensing of Environment, Progress in Oceanography, Deep-Sea Research Part II, Climate Research, Remote Sensing, Current Climate Change Reports, Journal of Marine Systems, Continental Shelf Research.

Panel reviews: NASA (ROSES-2016, ROSES-2019), Latvian Science Council (2012).

Editorial board: PeerJ (Environmental Science section, 2017-present).

Session co-chair: Ocean Sciences 2020, session PI21A (From Physics to Predators: Environmental Forcing of Marine Ecosystem Hot Spots).

Panel member: US CLIVAR Phenomena, Observations, and Synthesis Panel (2020-2023)
TPOS Scientific Advisory Committee (2022-2025)

PhD thesis committee: Pierre Chabert (LOCEAN, France), Thomas Hermilly (LOPS, France)
