### RESEARCH INTERESTS

My work focuses on the ecological importance of spatial and temporal dynamics in pelagic marine ecosystems. I am particularly interested in the effects of behavior like schooling, cooperation, and other 'group' processes on inter-individual and predator-prey interactions. To address these complex, four-dimensional problems, a significant emphasis of my efforts is the development and thoughtful application of active acoustic techniques, integration of acoustic technologies within novel platforms, and, through collaborations, the combination of these tools with other approaches including passive acoustic listening, optical sampling, animal tagging, behavioral modeling, and environmental DNA.

### CURRENT POSITIONS

<b>Research Chair</b> , Monterey Bay Aquarium Research Institute	02/21-present
<b>Senior Scientist</b> , Monterey Bay Aquarium Research Institute	07/16-present

### EDUCATION

<b>University of Hawaii at Manoa</b> , Honolulu, Hawaii <i>Ph.D.</i> , Department of Zoology	2003
<b>Brown University</b> , Providence, Rhode Island <i>B.S. with Honors</i> , Aquatic Biology	1998
<b>Duke University Marine Laboratory</b> , Beaufort, North Carolina	1/97-5/97

### PREVIOUS EXPERIENCE

<b>Professor</b> , College of Earth, Ocean, & Atmospheric Sciences, Oregon State University <i>Assistant 07/04-06/09; Associate 07/09-06/14; Prof with indefinite tenure 07/14-07/18; on leave 07/16-07/18</i> <i>Professor by Courtesy 07/18-07/22</i>	07/04-07/18
<b>Post-Doctoral Fellow</b> , Hawaii Institute of Marine Biology Research advisor: <i>Whitlow Au</i>	05/03-07/04
<b>Research Assistant</b> , Bottomfish Project, Hawaii Institute of Marine Biology Research advisors: <i>Christopher D. Kelley and Whitlow Au</i>	08/00-05/03
<b>Research Assistant</b> , Hawaii Institute of Marine Biology	08/99-07/00
<b>Teaching Assistant</b> , Biology Program, University of Hawaii	08/98-08/99
<b>Teaching Intern Coordinator</b> , Biology Program, University of Hawaii	01/99-08/99
<b>Scientific Illustrator</b> , Department of Ecology and Evolution, Brown University Completed more than 300 scientific illustrations for <i>The Ecology of Atlantic Seashores</i> , Mark Bertness, Sinauer Associates, 1998, illustrated a poster for the Ecology Department more than a dozen journal articles	09/95-06/98
<b>Teaching Assistant</b> , Department of Ecology and Evolution, Brown University	01/98-05/98
<b>Research Assistant</b> , Duke University Marine Laboratory Research advisors: <i>Andrew Read and Heather Koopman</i>	01/97-05/97
<b>Research Assistant</b> , Psychology Department, Brown University Research advisors: <i>Andrea Simmons and James Simmons</i>	12/94-12/96

### CONTINUING PROFESSIONAL EDUCATION

<b>Media 101</b> , Riveter Communications	02/22
<b>Duarte Designs</b> Visual Storytelling Workshop	02/19
<b>PopTech!</b> Science Fellows training in communication, presentation design, leadership, and collaboration	10/12
<b>COMPASS Communications Training Workshop</b>	10/12
<b>Communicating Ocean Science Workshop</b> , COSEE Pacific Partnerships	02/09
<b>Science Writing Workshop</b> , Author Julia Whitty hosted by OSU's Spring Creek Project	10/08
<b>Media Training</b> , OSU News and Communications	12/07
<b>Donor Training</b> , OSU Foundation	08/07
<b>Survival Strategies for Faculty New to Teaching</b> , OSU Center for Teaching and Learning	10/06

## HONORS AND AWARDS

- **Outstanding Reviewer**, Canadian Journal of Fisheries and Aquatic Sciences 2022
- **Society for Science**, Named to 'Notable Alumni' List 2022
- **Outstanding Associate Editor**, Limnology and Oceanography 2021
- **Feature Article**, Marine Ecology Progress Series 2020
- **Medwin Prize in Acoustical Oceanography, Acoustical Society of America** 2020  
For the effective use of sound in the discovery and understanding of biological processes in the sea
- **Slepecky Prize Lecturer**, Syracuse University 2019
- **Blinks Memorial Lecturer**, Stanford University, Hopkins Marine Station 2019
- **Fellow, Acoustical Society of America** 2017
- Lead Principal Investigator for the *Strategic Environmental Research and Development Program's* (DoD) **Project of the Year** for Deep mapping of teuthivorous whales and their prey fields 2016
- Part of the team selected by the *Secretary of Commerce to receive the Group Gold Medal for Scientific and Engineering Achievement*, recognizing the Bering Sea Project as "the most comprehensive integrated ecosystem assessment ever completed, revealing how climate cycles affect the Nation's largest fishery" 2016
- **Distinguished Lecturer**, IEEE Oceanic Engineering Society 2012-2019
- **MacArthur Fellowship** for "exceptional creativity and promise for important future advances based on a track record of significant accomplishment" 2010-2015
- **Kavli Frontiers Fellow**, National Academy of Sciences 2007, 2013, 2014  
Attendee in 2007, Speaker in 2013, Organizer for 2014
- **Promising Scholar**, Oregon State University 2012-2013
- **Best Presentation Award**, Pacific Marine Science Organization (PICES) Committee on Monitoring 2009
- **R. Bruce Lindsay Award**, Acoustical Society of America 2009  
Presented to an early career member who has been active in the affairs of the Society and contributed substantially to the advancement of acoustics. Citation: "For contributions to marine ecological acoustics".
- **Ocean Sciences Early Career Award**, American Geophysical Union 2008  
For "innovative application of acoustical techniques".
- **Presidential Early Career Award for Scientists and Engineers FY 2005 (PECASE)** 2006  
The highest honor bestowed by the United States government on "outstanding scientists and engineers beginning their independent careers".
- **Feature Article**, Marine Ecology Progress Series 2006
- **Women in Acoustics Young Investigator Award**, Acoustical Society of America 2006
- **Office of Naval Research Young Investigator Award** 2005
- **Best Young Presenter Award**, European Congress on Underwater Acoustics, Delft, Netherlands 2004
- **The Future of Animal Bioacoustics and Acoustical Oceanography**, Acoustical Society of America 2004  
Selected as one of nine young presenters to speak at the Society's 75<sup>th</sup> Anniversary Celebration Plenary
- **Excellence in Science Communication Award** 2003  
15<sup>th</sup> Biennial Conference on the Biology of Marine Mammals, Best Presentation by a Non-Student
- **DIALOG V Symposium Invited Participant**, American Society of Limnology and Oceanography 2003
- **Best Student Paper in Acoustical Oceanography**  
- 145<sup>th</sup> Meeting of the Acoustical Society of America, Nashville, Tennessee 2003  
- 1st Pan-American/Iberian Meeting on Acoustics, Cancun, Mexico (2<sup>nd</sup> Prize) 2002  
- 142<sup>nd</sup> Meeting of the Acoustical Society of America, Ft. Lauderdale, Florida 2001  
- 140<sup>th</sup> Meeting of the Acoustical Society of America, Newport Beach, California 2000
- **Best Student Paper in Animal Bioacoustics**  
- 145<sup>th</sup> Meeting of the Acoustical Society of America, Nashville, Tennessee 2003  
- 140<sup>th</sup> Meeting of the Acoustical Society of America, Newport Beach, California 2000
- **Excellence in Doctoral Student Research Award** University of Hawaii Regents 2002
- **National Science Foundation Doctoral Dissertation Improvement Grant**, IBN 2002
- **Pauley Marine Biology Scholar Achievement Rewards for College Scientists Foundation** 2001
- **Sigma Xi** Inducted as a Member of the scientific honor society 2001
- **Albert Tester Memorial Award** for Best Graduate Student Paper, University of Hawaii 2000
- **Leonida Scholarship Endowment** for Fisheries Research, Oceanography Dept, Univ. of Hawaii 1999
- **Aspect Technology Fund Award** Recipient for the Development of Novel Technology 1999

## GRANT AND CONTRACT SUPPORT

My research program has attracted funding from diverse sources including the National Science Foundation, Office of Naval Research, National Oceanic and Atmospheric Administration, National Oceanographic Partnership Program, Minerals Management Service, North Pacific Research Board, Strategic Environmental Research and Development Program (DoD), and Packard and Keck Foundations, totaling more than \$10 million to my home institution.

### National Science Foundation, Office of Polar Programs 2019-2024

Co-Principal Investigator (\$323,836)  
 'Linking Predator Behavior and Resource Distributions: Penguin-directed Exploration of an Ecological Hotspot'  
 Collaborators: Mark Moline, University of Delaware; Megan Cimino, University of California at Santa Cruz

### Office of Naval Research, Marine Mammal Biology 2018-2022

Co-Principal Investigator (\$28,000)  
 'Integrating Information on Displacement Caused by Mid-Frequency Active Sonar and Measurements of Prey Field into a Population Consequences of Disturbance Model for Beaked Whales'  
 Collaborators: Nancy DiMarzio, Naval Undersea Warfare Center Division; John Harwood & Len Thomas, University of St. Andrews; Andre de Roos & Vincent Hint, University of Amsterdam

### Office of Naval Research, Marine Mammal Biology 2017-2020

Co-Principal Investigator (\$15,200)  
 'The use of navy range bottom-mounted, bi-directional transducers for long-term, deep-ocean prey mapping'  
 Collaborator: David Moretti, National Undersea Warfare Center

**Office of Naval Research, Marine Mammal Biology 2015-2018**

Principal Investigator (\$681,355)  
 'Linking deep-water prey fields with odontocete population structure and behavior'  
 Collaborators: Mark Moline, University of Delaware; Brandon Southall, Southall Environmental Associates;  
 Diane Claridge, Bahamas Marine Mammal Research Org; David Moretti, National Undersea Warfare Center

## **TECHNOLOGY DEVELOPMENT**

In my work, I have often found existing tools incapable of addressing key questions. As a result, I have made significant investments in new analytical approaches and technologies. At MBARI, our research group is collaborating with engineers and operations experts to integrate echosounders into a variety of robotic platforms including tethered Remotely Operated Vehicles (ROVs) and autonomous vehicles including the WaveGlider surface vehicle and the small Long-Range AUV and large Dorado class underwater vehicles. A primary objective of these efforts is the integration of acoustic sampling with other sampling techniques including optics, imaging, and eDNA. A few technological developments from my laboratory and their scientific applications are highlighted below.

### **Moorable echosounders**

I developed and constructed inexpensive, internally recording autonomous echosounders that we deployed off the coasts of Hawaii, Oregon, and in Monterey Bay, resulting in descriptions of diel migration, plankton layer dynamics, and fish school behavior.

### **Nocturnal light sensors**

Light sensors that are sensitive enough to measure nocturnal illumination are not available. To address the role of nocturnal light and lunar cycle on diel migration, I designed, built, and calibrated a simple and inexpensive logging sensor to quantify surface irradiance at night.

### **Deep-water broadband sonar**

In collaboration with electrical engineer Whitlow Au, I designed and fabricated a biomimetic sonar. This system uses a broadband, dolphin-like sonar signal to provide rich backscatter information. Along with biologist Chris Kelley and manned submersible engineer Chris Taylor, we deployed this system along with high resolution video cameras to depths of over 1000 m from a manned submersible and a profiling package to obtain echoes from free swimming animals.

### **Micronekton stereo camera**

To provide ground-truthing for highly mobile micronekton in untrawlable areas, we developed a stereo camera system that utilizes only infrared illumination to minimize avoidance. To facilitate sampling from small vessels, the system can be used in an internally recording configuration. The system has provided details on the differences in migration behavior amongst species and information for models of predator energetics.

### **Isopycnic ROV + zooplankton acoustic system**

In collaboration with biologists Timothy Cowles and Mark Benfield, we modified a commercially available ROV to maintain its vertical position based on water density measured with the onboard CTD instead of pressure. This allows us to keep our sensors within fine-scale plankton features even as these important biological structures are moved by internal waves and other processes. The ROV carries a very high frequency (1, 5, and 7 MHz) zooplankton sonar system we developed to resolve individual copepods. The sonar complements the sampling from an underwater video microscope developed by Mark Benfield.

### **Dual-frequency echosounder + deepwater AUV**

In collaboration with biological oceanographer Mark Moline, engineer David O’Gorman (now with Tesla) and engineers at Kongsberg Hydroid and Kongsberg Simrad, we autonomized and integrated two, customized split-beam EK60 systems into a REMUS 600 vehicle. In partnership with Echoview, we developed on-board processing capabilities that are used to alter vehicle flight based on the characteristics of biological targets. This system is providing descriptions of the distribution of biota in the meso and bathypelagic.

### **Smart glider + acoustic system**

In collaboration with physical oceanographer Jack Barth, robotics engineer Geoff Hollinger, electrical engineers from Kongsberg Simrad, and the engineering team at Teledyne Webb, we integrated two low power sonar systems into a Slocum glider. One transducer looks upward and the other downward to provide a synoptic view of the photic zone while the vehicle obtains profiles of physical and bio-optical characteristics of the water. The vehicle expands on the onboard processing and flight alteration of our deepwater AUV using algorithms inspired by our research with predator hunting behavior to search for, identify, and track biological hotspots that occur as a result of coastal upwelling.
